| Description    | Transformer/battery operated tap For sink. Countertop-mounted Flow rate: 6 l/min Rubinetto monoacqua.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                |              |            |        |
| Certifications | TUV UNI EN ISO 9001 system certification. CE declaration of conformity to the European Low Voltage Directive 35/2014. CE declaration of conformity to the European Directive for Electromagnetic Compatibility 30/2014.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                |              |            |        |
| Features       | <p>Electronic tap with photocell activation. Ideal for private environments, communities and disabled people, it allows for significant water savings and greater hygiene compared to traditional and timed taps.</p> <p>Alimentazione tramite 4 pile stilo o trasformatore; possono essere usati indipendentemente uno o l'altro o entrambe. Batterie non fornite. Antispreco-antiallagamento: il sensore non può essere bloccato in posizione aperta, se viene coperto per più di 50 secondi l'erogazione si ferma automaticamente. Per ripristinare le operazioni normali deve essere rimosso qualsiasi ostacolo. Temperatura acqua calda in ingresso: Massimo 70°C . Tempo di fornitura massimo (tempo di sicurezza antivandalò): 60 secondi. Ritardo di attivazione: 0,5 sec. Distanza di azionamento impostata di fabbrica: 120 - 180 mm. Durata batteria: 110,000 cicli circa.</p> |                |              |            |        |
| Finishes       | Chrome-plated                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                |              |            |        |
| Materials      | Brass.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                |              |            |        |
| Dimensioni     | 340 x 250 x 95                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                |              |            |        |
| Installation   | <p>Attach to the sink. Connect electrical and hydraulic supply. Check the tightness of the connections. NOTE No components need to be modified. Use only original components. Do not remove the electrical connectors or the transformer plug. NOTE After connecting the power supply, it is very important not to place hands or objects within the sensor's reading range. Safety information: The device must be mounted by a competent and qualified professional installer. The manufacturer is not responsible for the installation of the product. Keep the product properly clean.</p>                                                                                                                                                                                                                                                                                            |                |              |            |        |

|             |                                                                                                                                                                                                                                                                        |
|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Maintenance | If the tap leaks, clean the solenoid valve. Carry out adequate cleaning with soap and water, do not use aggressive, abrasive, corrosive products, alcohol, acids, acetone, thinner, etc. Don't scratch. Do not use the product for purposes other than those intended. |
